5. System configuration

ECAS is an extremely variable system that can be adapted to meet the requirements of the vehicle with great efficiency. Up to 3 base control loops may be present in the vehicle. In addition, it is possible to control a lifting axle. The selection of the system components to be used is determined by how the vehicle manufacturer expects the system to perform.

To illustrate this further, the following pages show different control circuits for the complete vehicle combination.

For ABS or EBS, the configuration can be determined on the basis of the speed sensors/modulators installed in the system (e. g. 4S/3M); in ECAS, on the other hand, it is the number of basic control circuits for level control which determine the configuration. This number corresponds to the number of distance sensors installed. A system with two distance sensors, for example, is therefore referred to as a 2-point control system.

The specification of the type of control may apply to all sections of the vehicle (as shown here) or to the components of a single axle. A vehicle with full air suspension and 3-point control, for example, consists of

the steered axle with 1-point control and a driving axle with 2-point control.

Generally, the following control types are found in vehicles:

- 1-point control
- 2-point control
- 3-point control

Looked at axle by axle, **1-point control** is found on steered front axles and on rear axles. In vehicles with partial air suspension, the driving axle is sensed by a distance sensor for 1-point control.

**2-point control** is used in cases where irregular or uneven loading is expected in vehicles with a large tyre tread width, or in vehicles with a high centre of gravity. Even from an overall vehicle perspective, a 2-point control is also evident in vehicles with full air suspension where front and rear axles are equipped with one distance sensor each.

**3-point control** is only found in vehicles with full air suspension and denotes the combination of 1-point control on the steered front axle and 2-point control on the rear axle.

1-point control

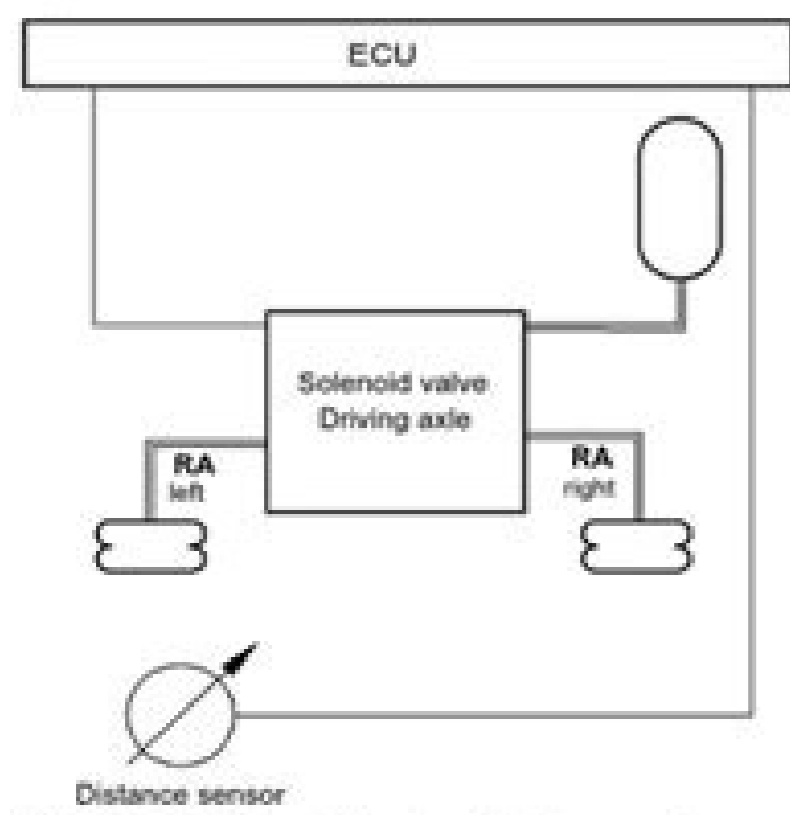

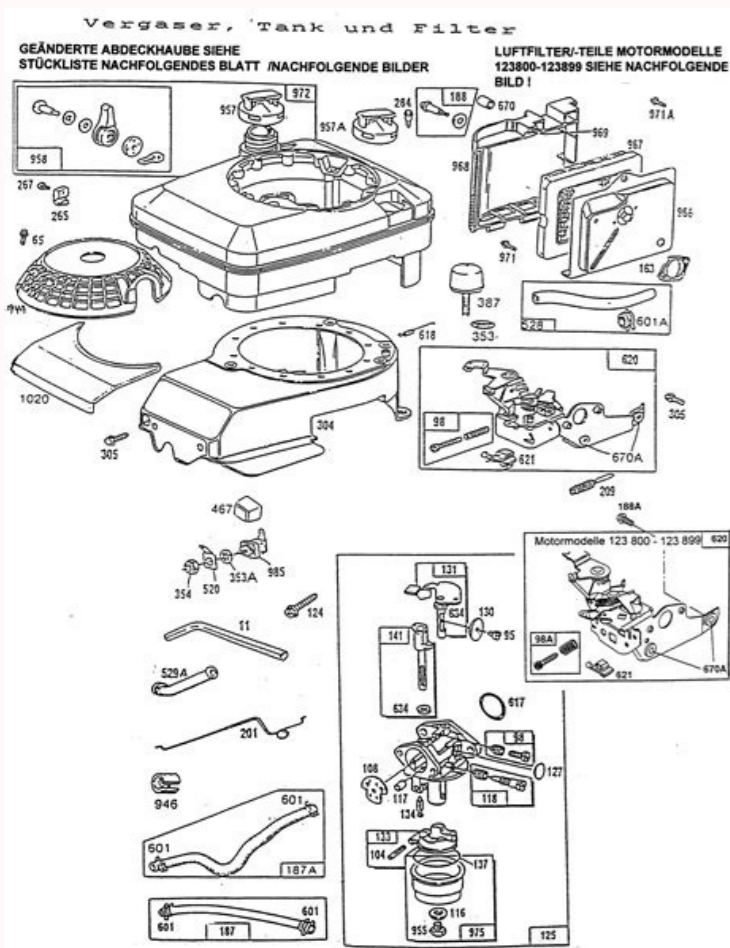

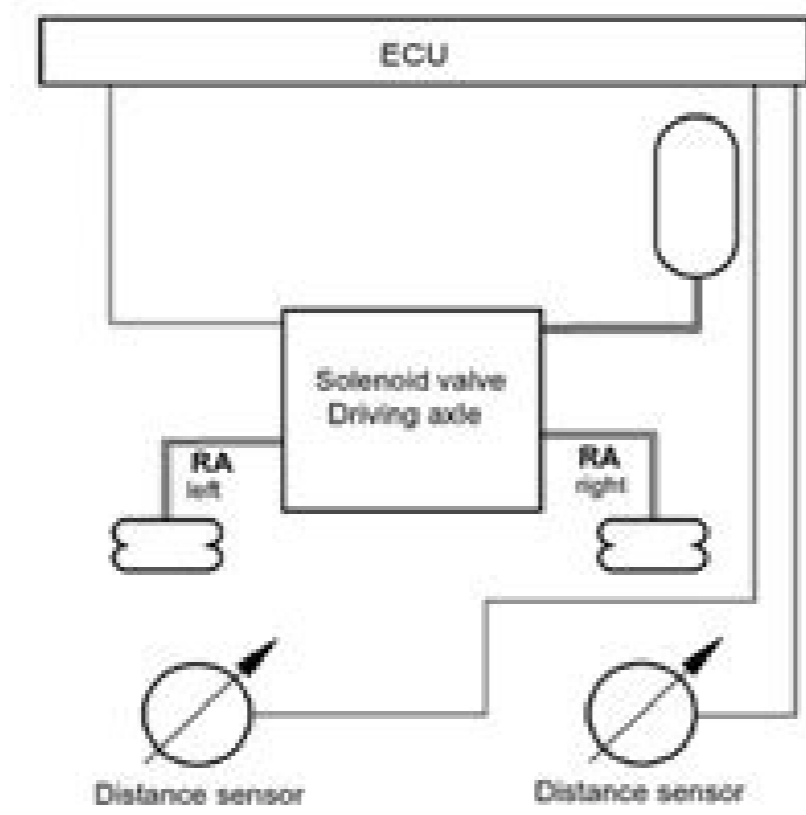

Abb. 13 Control for vehicles with partial air suspension

2-point control

Welcome to ManualMachine You have been successfully registered We have sent a verification link to to complete your registration. In testing, we've seen up to 60 Mbps down and up to 20 Mbps up. Placing mini-towers in high-traffic areas could lead to call failure when the device is at maximum connections. (going on over a year of operation.) Keep reading to learn how to find Intermatic timer manuals online. Perform a Simple Google Search The first step you can take to find Intermatic timer manuals online is to do a Google search. View the Groupon Goods FAQ to learn more. For those who have a problem with leaving the lights on, Intermatic timers are a great solution. Internet with reliable high speeds. Many of the documents provided will give you a full overview of the features on the Intermatic timer that you have as well as how to use it. Use YouTube There might be a YouTube tutorial showing you how to use your Intermatic timer. From there, you can use a contact email to get in touch with the supplier. Range Approximately 3,000 square feet Handoff Moving into 4G LTE CellSpot area Calls started on the T-Mobile cellular network are not automatically handed over to the 4G LTE CellSpot. When a line associated with the CellSpot is canceled/ported out, the CellSpot is immediately deactivated. Tech specs Table of tech specs for the 4G LTE CellSpot Spec 4G LTE CellSpot Maximum connections 16 simultaneous users (8 on 4G LTE, and 8 on 3G/4G UMTS) Any T-Mobile customer within range can connect securely, and connections cannot be blocked. Intermatic timers are popular among home and business owners. You can do this by going to the company's website and locating its contact information. Order, cancel, or return To improve your indoor coverage, visit a T-Mobile store or contact us to discuss the best coverage solution for you. If you cancel service, port out, or don't want the CellSpot anymore, we'll send you a prepaid shipping label to return it. To return a device, see Return a T-Mobile coverage device. Only one coverage device is allowed per coverage use address. If you don't prefer Google, you can use any other search engine. A person will start a group conversation asking for an Intermatic manual, and there will be replies from other users or a customer service representative detailing where to find the exact manual the conversation starter asked for. Go to the Manufacturer's Website You can also find manuals by going to Intermatic's website. MORE FROM QUESTIONSANSWERED.NET Get help with your 4G LTE CellSpot. Possible fees may be charged for not returning the device in good condition. It creates a 3G/4G and 4G LTE signal to create better indoor coverage, more dependable voice calls, and consistent data speeds. Locations

must be an area where T-Mobile offers service and has local e911. Speed varies based on the connection, device, and simultaneous voice/data sessions. If you can't find the email, check your Junk/Spam folder. Satellite and cellular Internet are not supported. Your house guests or office staff can use the CellSpot without any extra setup. Try a speed test when connected to your home internet to check for: Ping /latency: 200 ms (or less) Download: 2 Mbps (or more) Upload: 0.5 Mbps (or more) Bridge mode: enabled UDP ports: 123, 500, and 4500 opened Cable or DSL internet is recommended. CellSpot overview The 4G LTE CellSpot is a mini cell tower in your home or small office, which connects through your high-speed Internet. There's also a chance the company will have a live chat feature, making it incredibly easy to ask for the manual to your Intermatic timer. It's likely that the manuals will come in the form of PDF downloads, so you'll need a compatible extension or application to view the PDF. Check Out Group Forums Another simple way to find Intermatic manuals online is to check out group forums that provide user-generated information. Your phone or device connects to the CellSpot over 3G, 4G, or 4G LTE, and your usage is billed to your account the same as your usage of the larger T-Mobile cellular network. It takes forever to really connect to Sprint the setup is easy. Only T-Mobile customers can use the mini tower. Type in the series of the Intermatic timer that you have followed by the word "manual." For example, if you have an ST01 Series in-wall timer, you will Google "ST01 series in-wall timer manual." Once you hit the search button, you'll be provided with a list of relevant search results. Wi-Fi operates at the frequencies of 2.4GHz or 5GHz. The CellSpot operates at the 1900MHz and 2100MHz frequencies. (It's not your Linksys router, so don't pull too hard you probably missed a screw.) you will also need to cut the bottoms off of the case I recommend using a heated soldering iron with a hot knife tip. Also, if you're getting one to provide services for your home for renters, and don't have a Sprint account, forget it... To see if one is available, use the Google search engine and type in "[series of your timer] Intermatic timer YouTube." Next, click on the "videos" tab at the top of the search function. I haven't verified what ports it needs access to, refer to instruction manuals. (Of course they will probably say, just plug it directly into your service providers modem, and plug your home connected devices to the back of this unit. (Which is not fun, because you're just trying to make sure their customers have coverage in a particular area where there is already coverage, but for some reason, their customer can't get a signal.) Also make sure you're in an approved area, or you'll have to... You can choose between a programming manual, configuration guide, instructions, brochure and more. No existing Wi-Fi or T-Mobile cellular signal needed! Phone & Internet requirements Supports all 3G (UMTS), 4G (HSPA+), and 4G LTE capable devices that can connect to the T-Mobile network. You don't need any indoor signal at home or Wi-Fi. Requirements Service requirements A valid e911 address is required on the line for the service to work. Therefore, multiple devices should not be in close proximity or used alone to address coverage in large buildings. (Which might not be the way you want it, it works well as they suggest, if you don't know what you want or care how you're setup.) I have not tested it in the place of a router, so I can't tell you anything positive or negative about running things behind this AP other than for its intended purpose, it works very well for providing phone and data services to Sprint phones. This was installed on Plywood in my HVAC room, on a floor that was 1,000 Sq Feet, (Walls and Metal in every direction, between the air conditioning and water softener.) It is installed at least 3' from all metal, and it works very very well according to the user, much better than when outside of the house. When the call is ended, the phone automatically connects to the 4G LTE CellSpot signal. From there, you'll be shown a list of relevant search results that come in the form of links to videos on YouTube. Don't worry about it, just check this with Sprint ahead of time.) Lastly, I don't trust this stuff and neither should you, make sure this unit has access to only its own network, if you have a public connection, it's fine if it uses the same IP, but put your home computers etc., on a NAT and isolate this from the computers you use most frequently just based on principal. Just note there are screws on the bottom and back, if you can't open it easily you missed one. This signal booster improves wireless coverage around homes up to 5,000 square feet after plugging into existing router Provides enhanced wireless coverage up to 5,000 square feet Designed for more reliable performance and less interference Improved in-building signal for home or office VoIP service capable Just plug Airave into existing router and broadband connection Auto call transfer when leaving home switches users to the nationwide Sprint network Compatible with all Sprint phones Automatic software upgrades Requires DSL, cable, or T1 internet connection and ethernet port Needs nearby power outlet Airave base station Power supply and cord External GPS antenna 20' Cat 5 ethernet cable User guide Model number: C1-600-RT Condition: new Dimensions: 1.11"x1.11"x1.11" For questions pertaining to this deal, click the Ask a Question button below. The address must have no existing CellSpot or signal booster. Need more help? They are usually found on suppliers' websites. This will not interfere with Wi-Fi routers. These timers control when an appliance or lighting system switches on and off. Leaving 4G LTE CellSpot area Calls started on the 4G LTE CellSpot automatically hand over to cellular network if a stronger cellular signal becomes available. To do this, go to the Intermatic site and use the filter list shown on the left side of the page to find the instructions you're looking for. Handoff is not guaranteed, due to outdoor network availability and coverage levels. When this works, it works. Devices supported T-Mobile and non-T-Mobile (BYOD) devices that can connect to the T-Mobile network's 3G, 4G, or 4G LTE Technologies frequencies 4G LTE: Band 2 (1900 MHz) (V2 model only) Band 4 (2100 MHz) (V1 & V2 models) Includes VoLTE UMTS/WCDMA/HSPA Band 2 (1900 MHz) No 2G bands Data speeds Speeds cannot exceed your Internet provider's (ISP) data speed. (I wish it was wall mount, but it's not.) I did take the case off, and put screws through it into the wall, covered them with electric tape and this unit has not caused a single issue with overheating etc... For post-purchase inquiries, please contact Groupon customer support. Or, you can perform the search on YouTube itself. Contact Your Supplier If all else fails, you can contact the company you bought the Intermatic timer from. Goods sold by Groupon Goods. In this case, the devices will not interfere with one another, but they do not work together (such as not handing off calls between devices). This is for your safety, so emergency services can find your location. Multiple CellSpots can be at different addresses in the same area. It cannot be reactivated and must be returned. Sprint will give you all sorts of !@#&\$ for thinking you can just have one of their repeaters in your house without a live cell account. (Get your renter to pre-agree with using their account for your setup and prepare to be entangled with this.) Also if you tell them you're hosting for someone not yourself, so they don't charge for the operation of the unit otherwise it's x\$ ammount / year for taxes, let your renter know there will be some fees though, but not through you, through Sprint directly to their cell bill, fortunately they are not large fees.
